## PROFESSIONAL SUMMARY

---

Compassionate and detail-oriented Registered Nurse with more than 3 years of clinical experience in Medical Ward settings within private and tertiary healthcare facilities in Malaysia. Experienced in providing comprehensive nursing care for patients with acute and chronic medical conditions, including patient assessment, medication administration, clinical documentation, infection control, and multidisciplinary coordination. Demonstrated ability to manage 6–20 patients per shift in fast-paced environments while maintaining patient safety and quality care standards. Exposure to Obstetrics & Gynaecology (O&G), Daycare Unit, Emergency, Surgical, Orthopaedics, and Paediatrics through clinical deployment and internship rotations. Skilled in venipuncture, IV therapy, wound care, specimen collection, and discharge planning. Strong understanding of PDPA compliance, nursing protocols, and patient-centred care practices. Malaysian-registered nurse seeking a Staff Nurse position in Singapore and willing to undergo Singapore Nursing Board (SNB) registration, licensure examination, and supervised practice.

## WORK EXPERIENCE

---

### Pantai Hospital Melaka, Malaysia

#### Staff Nurse – Medical Ward

Nov 2022 – Present

- Deliver comprehensive nursing care for with acute and chronic medical conditions in a fast-paced medical ward environment with an average daily caseload of 6–20 patients per shift.
- Conduct patient assessments including vital signs monitoring, pain assessment, blood glucose monitoring, venipuncture, specimen collection, and timely escalation of deteriorating patient conditions to medical officers.
- Administer oral, intravenous (IV), intramuscular (IM), and subcutaneous (SC) medications in accordance with hospital protocols and medication safety standards, including double-checking high-alert medications.
- Assist doctors and multidisciplinary healthcare teams in coordinating individualized patient care plans, discharge planning, rehabilitation support, and treatment follow-up, resulting in shorter patient stay by 1.5 days average.
- Maintain accurate and timely nursing documentation, medication records, intake/output charts, and PDPA-compliant patient records with high attention to detail and confidentiality, reducing documentation errors by 10%
- Support infection prevention and control initiatives achieving 100% compliance in hand hygiene practices, isolation protocols, PPE usage, and ward safety procedures.

#### Deployment – O&G and Daycare Unit

- Provide pre-operative and post-operative nursing care for gynaecological and daycare of 30+ patients monthly, including patient preparation, monitoring, and recovery support.
- Monitor patients' vital signs, pain levels, and post-procedure conditions while identifying and escalating abnormal findings promptly to physicians.
- Assist with patient admissions, discharge processes, health education, and follow-up instructions to ensure continuity of care and patient understanding.
- Prepare and maintain medical equipment, treatment rooms, and patient care areas in accordance with infection control and safety standards.
- Collaborate with doctors, nurses, and allied health professionals to ensure efficient patient flow and coordinated clinical care within the unit, reducing waiting time by 20% through coordinated care.
- Complete accurate nursing documentation and procedural records in compliance with hospital policies and quality assurance requirements.

#### Nursing Internship

2019 – 2021

#### Hospital Sultan Ismail, Johor Bahru / Regency Specialist Hospital

- Completed clinical rotations in Medical, Surgical, Paediatrics, Orthopaedics, and Emergency departments, gaining broad exposure to inpatient and acute care nursing practices.
- Assisted registered nurses in patient assessment, vital signs monitoring, activities of daily living (ADL), wound dressing, and bedside nursing care for multiple patients daily.
- Performed supervised nursing procedures including IV therapy, specimen collection, medication preparation, nasopharyngeal swab collection, and basic emergency response care.
- Participated in multidisciplinary ward rounds, patient handovers, and nursing documentation to strengthen communication and clinical coordination skills.
- Applied infection prevention and control measures including PPE compliance, hand hygiene, and isolation precautions during routine patient care.
- Developed strong teamwork, adaptability, and time management skills while working in high-volume clinical environments under supervision.
